### PROGRAMME INFORMATION & APPLICATION GUIDELINES

#### Opportunity Overview

The Visual Artist Residency is a new fully-funded residency for Scotland-based visual artists aged 50 or above. This two-week residency is scheduled to take place from Monday 29 August to Sunday 11 September 2022, but alternative dates during the autumn and winter of 2022/23 can be negotiated. The resident will receive a fee, a travel allowance, and a research/materials allowance. The deadline for applications is Monday 29 August (midnight).

#### Introduction

Established in 1999, Cove Park is an artists' residency based in Argyll on the west coast of Scotland. We host national and international cultural producers and researchers working in all artistic disciplines, in the creative industries, and in academic and scientific contexts. We provide the facilities, the support, and the care required for the development of new ideas and new projects, collaborations, and interdisciplinary practice. Residents stay on site in private accommodation and have access to private studios, communal work and meeting space, a library, and Cove Park's 50-acre rural site. We host between 10 to 12 residents at any one time. This means every resident can meet and work alongside individuals and collaborative groups from a wide range of backgrounds and career stages. We organise informal peer-to-peer events to encourage discussion, the exchange of ideas and experiences, and the development of new connections.

In 2021 Cove Park introduced an enquiry-based model for producing cross-disciplinary work and collective intelligence around pressing global concerns. This is founded upon the belief that artistic research is uniquely placed to unpack some of the most acute problems of our times, and that the transformative power of the arts is amplified through collaboration and exchange with other disciplines, including academic and scientific research. Coinciding with the COP26 conference in November 2021, we launched our first - and now permanent - enquiry on the environmental crisis. Since then all our residents have the opportunity to take part in and actively contribute to this ongoing research.
